PRODUCT SPECIFICATION (Private and Confidential)

Product Name: Black Cherry Filling

Code: BCBR110414

Customer: Bradley's

Product Description: Black Cherry fruit preparation stabilised with waxy maize modified starch with visible fruit pieces. Free from Taints or off flavours.

Country of Origin: Manufactured in UK

Product Details:

Ingredients	%	Country of Origin
Sour Cherries	45.00	Poland
Water	30.97	UK
Sugar	18.00	UK, France
Modified Waxy Maize Starch	5.30	Hungary, France, Italy
Anthocyanin / Grape Skin Extract E163	0.40	France, Italy, Denmark
Citric Acid E330	0.10	China, Austria
Potassium Sorbate E202	0.10	China
Natural Flavouring Carrier: Propylene Glycol, Water	0.10	UK
Spinach E140i	0.03	Germany, Hungary, Italy
	To 100%	

Ingredient Listing: Cherries, Water, Sugar, Stabiliser: Modified Waxy Maize Starch, Colour: Anthocyanin, Acidity Regulator: Citric Acid, Preservative: Potassium Sorbate, Natural Flavouring, Colour: Spinach Extract.

GMO: Modified Waxy Maize Starch - Valid IT or SGS IP Certified
Citric Acid - Valid IT or SGS IP Certified

Packaging: White Polypropylene bucket & lid, with diaphragm seal.
Net weight 6 kg

Storage Details: Storage Unopened at Ambient (15-22° c), Cool, dry, away from direct sunlight and preferably less than 20C.

Once Open Store Chilled, less than 5° c

Delivery Details: Ambient transport

Labelling Details: Naked Foods Label with Product Description, Weight, Batch Number, Best Before date. Store in refrigerator after opening.

Shelf life: 6 Months from date of production in storage conditions as above if unopened. If opened, packaging should be re-sealed and refrigerated and use within 5 days.

Minimum shelf life on delivery 70%.

Chemical & Physical Specification:

	Sample Pot
Refractometric Solids	29.0 - 34.0
Viscosity (Modified Ford Cup Method)	7.0 - 9.0
pH	3.3 - 3.9

May contain Cherry Stones

Free from foreign bodies

RHS Colour: 59A (Target)

Microbiological Standards:

TVC < 1000 cfu/g

Yeasts < 10 cfu/g

Moulds < 10 cfu/g

Micro testing is not done for every product produced, unless required by the customer & costed into their product accordingly. Micro testing is done on between 30+ products per week and is used as an indicator on process, hygiene and site GMP. These results are used to establish the micro limits for the site as a whole. Example results available on request.

Metal Detection: 1.5mm Ferrous
1.5mm Non - Ferrous
2.5 mm Stainless Steel.

HACCP FLOW CHART for all products

Step 1. Raw Materials & Packaging.

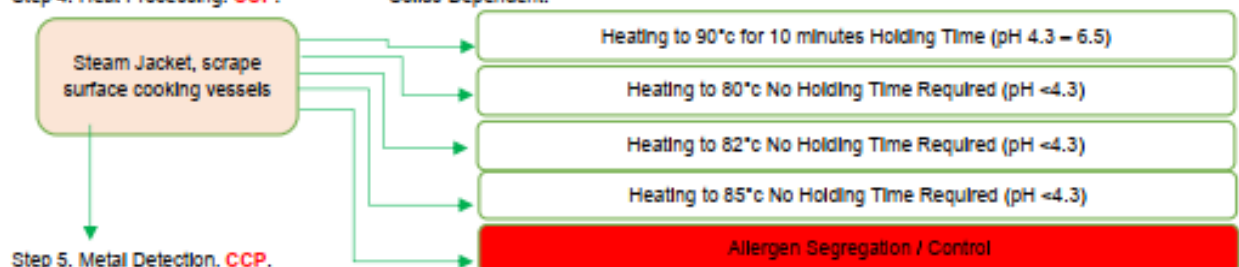

Step 2. Storage.

Step 3. Ingredient Addition.

Step 4. Heat Processing. CCP.

Step 5. Metal Detection. CCP.

Step 6. Product Packing. CCP.

Step 7. Labelling.

Step 8. Overnight Cooling.

Step 9. Despatch.

Additional Testing Statement

Naked Foods Limited have controls in place to assure suppliers provide materials which fully comply with all EU legislation.

- Pesticide testing - On-going testing by fruit suppliers and sampled annually by Naked Foods to verify and ensure all national MRL's are being complied to.
- Heavy Metal Testing - On-going testing by relevant materials by the supplier, which is supplied with a certificate of analysis for each delivery.
- Pathogen Testing - On-going random testing performed by Naked Foods to ensure there are no positive results or trends appearing.
- Mycotoxin Testing - for relevant products only. Annual reports are submitted by relevant suppliers to ensure MRL's are being achieved and maintained.

Health & Safety

Spillages can be washed away with water.
Skin contact is harmless - fines with water.
Not flammable.

This product complies with all UK and EC Food Regulations
Pesticide residue levels comply with EC Reg no 396/2005
Flavourings comply with EC Regulation No. 1334/2008
The Plastic Materials and Articles in Contact with Food 3008/2002
